

The d file is one of several daily average files that contain summary of various tests and measurements. The file is well-annotated and thus self-explanatory.

Excerpts from “*Brewer MKIV Spectrophotometer Operator’s Manual OM-BA-C231 REV B*”, August 15, 1999 page 75.

D Files: DJJJYY.nnn

‘D’ or Disk files are produced when the PD command has been issued, causing the software to ‘print to disk’.
These files usually contain end-of-day summaries and/or test data.
