

Stephen A. Montzka

I. Education:

Ph.D. 1988 Analytical Chemistry, University of Colorado, Boulder.
B.S. 1983 Summa Cum Laude with Highest Honors in Chemistry, St. Lawrence University.

II. Employment:

12/2021 – NOAA/GML Senior Scientist.
1/21-12/21 Chief, Halocarbon and Trace Species Division of NOAA’s Global Monitoring Laboratory. The Division maintains multiple sampling networks and measurements systems to track global atmospheric abundances of 40+ chemicals affecting climate, stratospheric ozone, and air quality. The Division also participates in process-based studies providing an improved understanding of atmospheric chemistry and dynamics. The data the Division supplies are integral to NOAA’s Annual Greenhouse Gas Index and the Ozone-Depleting Gas Index, which are internationally recognized metrics of the atmospheric abundance of climate-active and ozone-depleting gases; they also are regularly highlighted in international scientific assessments related to ozone depletion and climate commissioned by the World Meteorological Organization and the Intergovernmental Panel on Climate Change.
3/91-12/20 Research Chemist, NOAA’s Global Monitoring Laboratory. Dr. Montzka led the Chlorofluorocarbons Alternative Monitoring Project responsible for ongoing global atmospheric measurements of over 30 chemicals at multiple remote sites across the globe that influence climate, stratospheric ozone, and air quality.
1/89-3/91 National Research Council Post-Doctoral Fellow, Aeronomy Laboratory (now Chemical Sciences Laboratory), NOAA.
